

## **Orchid Species and Primary Hybrids**

This is a list of most of the species and primary hybrids available at The Orchid Trail. They consist of divisions, imported plants or our hybrids. Most are near flowering or flowering size although some are younger and will require two or more years to flower.

All are in limited supply and are subject to prior sale.

**Note:** We are expecting a new shipment of plants from Brazil in May.

Please contact us by phone, Fax or email for availability and price.
